

Canadian Occupational Performance Measure (COPM) training - online

Is this course suitable for you or your organisation?

This course is available for:

- Cerebral Palsy Alliance employees only

Why choose this course?

This online course is **compulsory for all new CPA allied health therapists** and can be accessed via your online learning login. The course is also recommended for all current Allied Health Professionals working directly with clients as a refresher. The course provides an in-depth understanding of the importance of using a formal goal setting tool to help identify an individual's personal goals. This tool helps promote the client/family centered approach to therapy that we use here at CPA. It is also important in providing education and training around the use of the outcome measure in clinical practice, which is required to demonstrate client progress in therapy. These outcome measures can then be used as statistical measures of progress in Service Review Documents when reporting back to the NDIS.

What content does the program cover?

This online course covers 5 chapters which focus on:

- The background of the COPM
- Theoretical foundations of the COPM
- Research evidence behind the COPM
- Administering the COPM and how to use it to identify client goals
- Scoring the COPM and how to use it as a statistically significant outcome measure

There are video demonstrations of the COPM administered and scored across numerous case examples.

Course completion requires:

Activities are included throughout the online learning.

Note: the Course Questionnaire must be submitted in order to record your completion.

What is the cost?

There is no cost for this course.

How long is the course?

Duration: 2 hours approximately
