

Disability Dynamic Adrian's Story

Disability Dynamic

Adrian's Story:

Adrian is 68 years old and has cerebral palsy. He shares his journey of returning to health from a serious illness and his commitment to 'ageing well'.

Target Audience

Disability Dynamic supports allied health staff, students and disability professionals to learn about disability and services available within the disability sector.

Activity information

Disability Dynamic follows the real-life stories of people living with disability at different stages of their life. The stories detail the experiences and perspectives of the people as they partner with services and work towards their goals and aspirations.

Disability Dynamic aims to advance skills, knowledge and attitudes of staff particularly in the areas of person and family centred practice, evidence based practice and supporting individual goals. Disability Dynamic assists staff, in a range of roles, to develop positive, effective partnerships with people who have a disability and their families.
